

Abstract of CN 1378865 (A)

A medicine coated support frame for blood vessel is composed of netted tube as support frame, medicine, and carrier. The mentioned medicine may be sartan kind of medicine, including valsartan, losartan, irbesartan, candesartan, telmisartan, eprosartan, saprisartan, tasosartan and zolasartan. This invention adopts a medicine action path different from that in the post, it is to play the part from the receptor's blockade action, and the sartan kind of medicines is selected as the ATI receptor blocking agent. Its advantages are better control of the speed to release medicine and high effect on preventing the recurrence of angiostenosis.
